

Myanmar – Monitoring media

From 1 to 31 May 2016, the Myanmar Institute for Democracy (MID), in cooperation with the Slovak media watch-dog MEMO 98 and supported by the National Endowment for Democracy (NED), monitored four television channels, two radio stations, three newspapers, and two online media outlets.

The monitoring included quantitative and qualitative methods of analysis. Quantitative analysis includes a number of numeric measures and indicators that can be counted and analysed, including the time or space allocated to each contestant or other relevant political subjects (in the prime time news and other relevant programmes), as well as the tone of the coverage in which these subjects were portrayed – positive, neutral or negative.

Qualitative analysis evaluates the performance of selected media outlets against ethical and professional standards, such as balance, accuracy, timely, choice of issues, omission of information, advantage of incumbency, positioning of items, inflammatory language etc. The enclosed charts show the coverage of political parties and other relevant subjects in the prime time news programs.
